Re: Letter of Recommendation  
DFW International Logistics Center

To Whom it May Concern:

Stream Realty Partners could not be more pleased with the services provided by F.A. Peinado Construction for our three new buildings at DFW International Logistics Center at DFW Airport. Over the course of three years, this project crossed several hurdles that would kill most developments, but Robert Shelton, Bruce Barclay and Teddy Peinado played integral roles in helping Stream push this project from a concept to reality.

Evan Burden and Jake Payne's diligence and expertise were paramount to working on a high-profile site at DFW Airport. In addition to resolving issues quickly and efficiently, Jake and Evan's leadership helped avoid several that could have derailed the project. F.A. Peinado reorganized a schedule and worked seamlessly alongside two different interior finish-out contractors that began prior to shell completion, allowing Stream to meet aggressive tenant occupancy dates.

F.A. Peinado's level of professionalism and their commitment to a project's success are greatly appreciated and best-in-class. We would recommend them to anyone in need of a high quality commercial general contractor. It was and continues to be an absolute pleasure working with F.A. Peinado Construction, and we look forward to working with them again.

Sincerely,

Steve Riordan  
Senior Vice President  
Stream Realty Partners – DFW, LP
