

MARS WRIGLEY

September 24, 2019

To Whom It May Concern:

This letter comes as recommendation for Peinado Construction.

My organization partnered with Peinado in 2018/2019 in the construction of a 1.4M square foot tilt up warehouse in the Dallas, TX area. This project was a monumental success, and this was due in large part to the expertise, professionalism, and drive of the entire team at Peinado.

The timeline for this project was extremely tight. The overall build for the facility was accomplished in roughly 9 months. A project of this scale is typically allocated 12-15 months. And this was despite roughly 70 days of rain experienced during the wettest fall on record for the DFW area. This execution is a testament to the Peinado team's leadership and dedication. Not only did their team bring expertise in the engineering and construction of the facility, but they were also true "partners" throughout the entire project. They spent a considerable amount of time taking input from Mars Wrigley and applying it into the facility design, which ultimately contributed to a higher quality finished product.

Many thanks to Brett Shirley and the entire team at Peinado Construction. They have been a tremendous partner for Mars Wrigley!

A handwritten signature in black ink, appearing to read 'AABL' followed by a long horizontal stroke.
